

Anatomy - downregulates - Gene

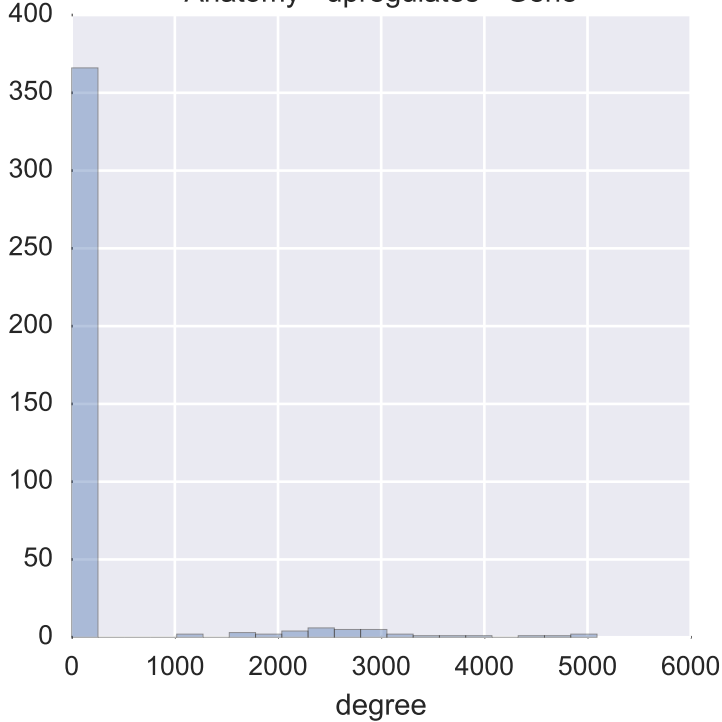

Anatomy - expresses - Gene

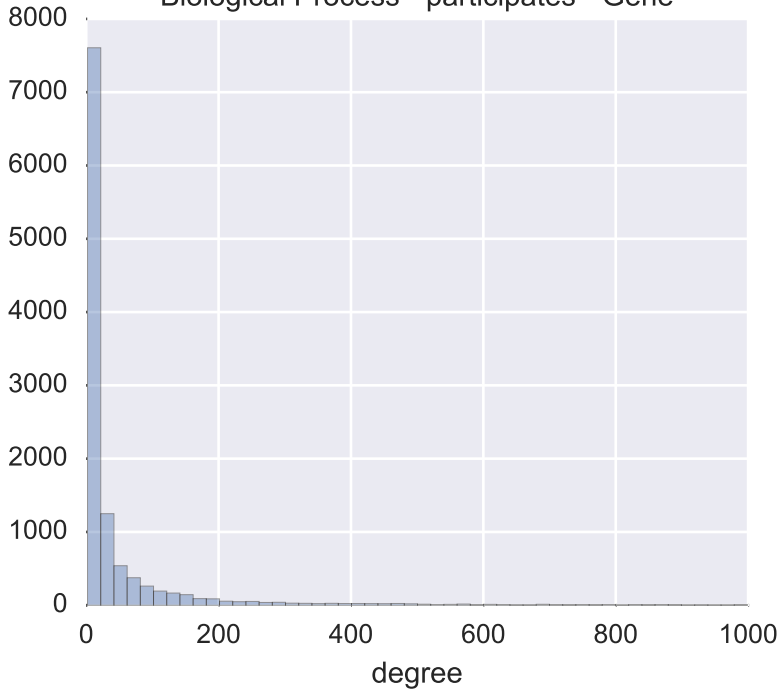

Anatomy - localizes - Disease

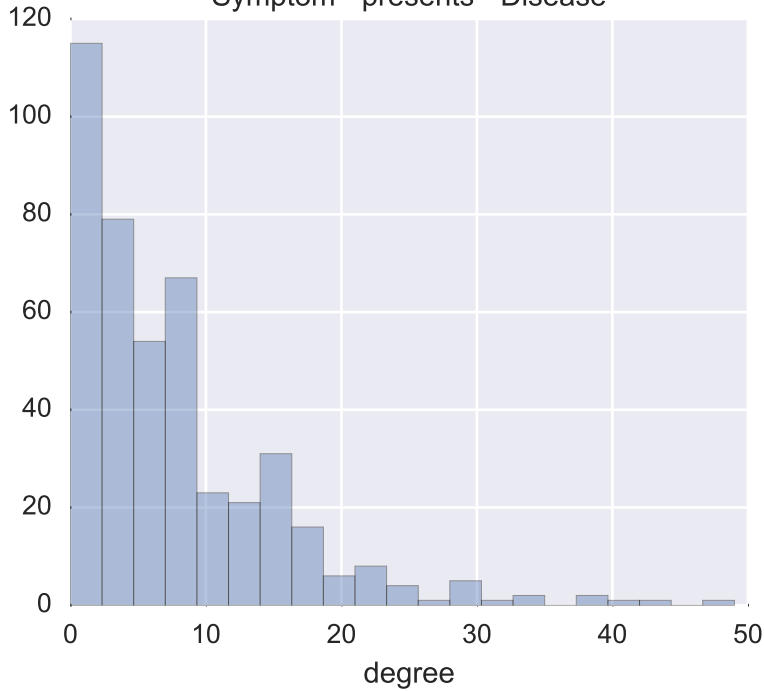

Anatomy - upregulates - Gene

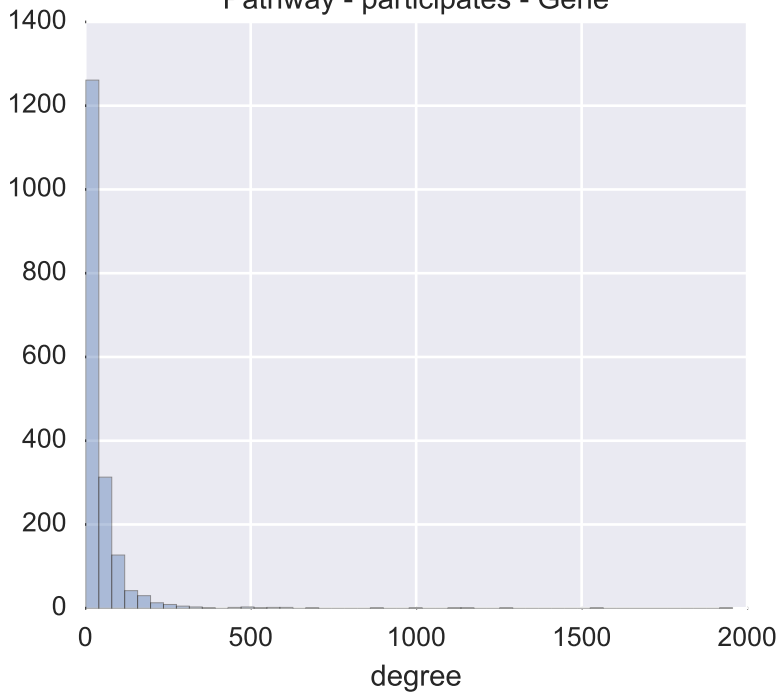

Biological Process - participates - Gene

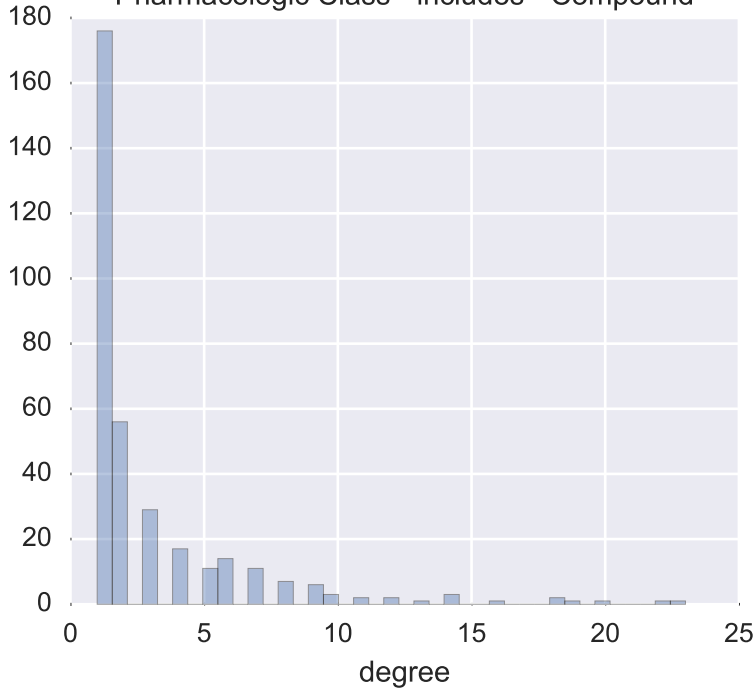

Symptom - presents - Disease

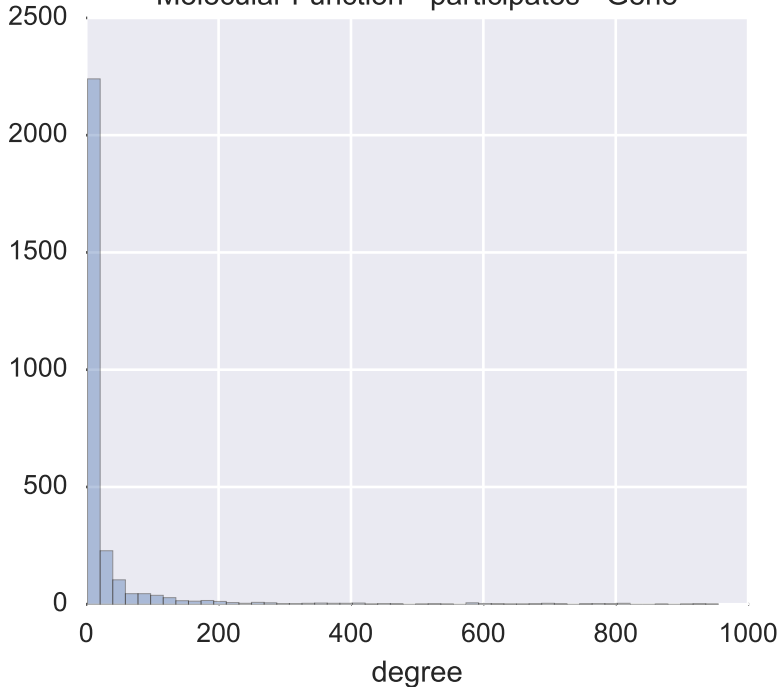

Pathway - participates - Gene

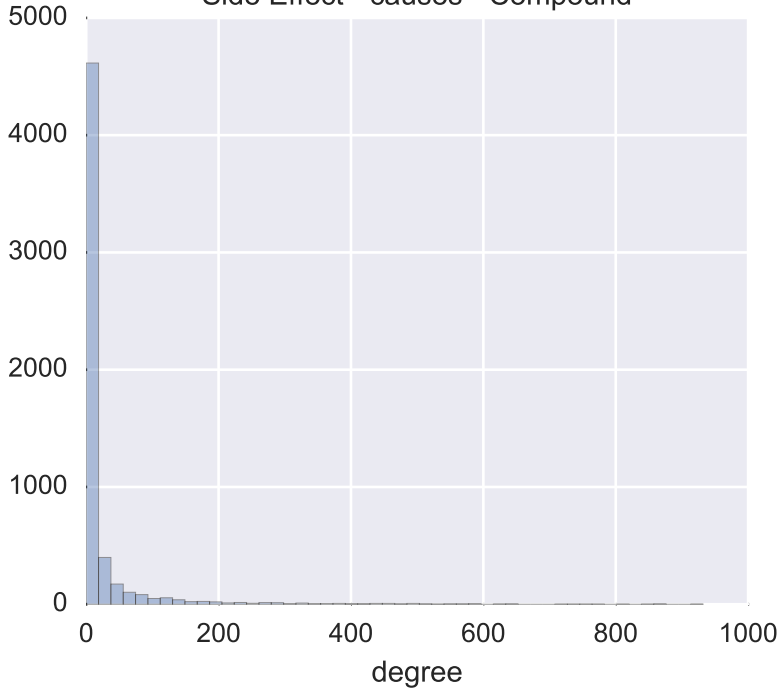

Pharmacologic Class - includes - Compound

Molecular Function - participates - Gene

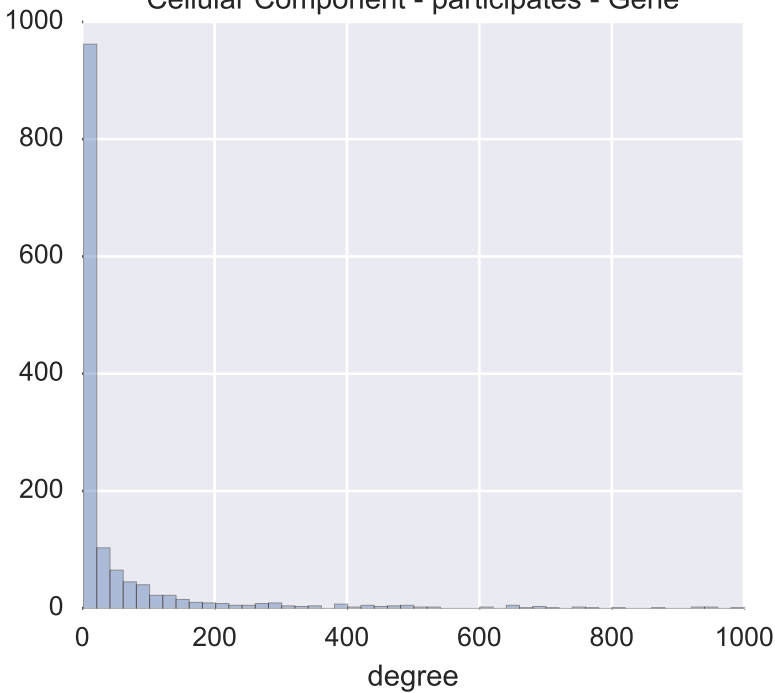

Side Effect - causes - Compound

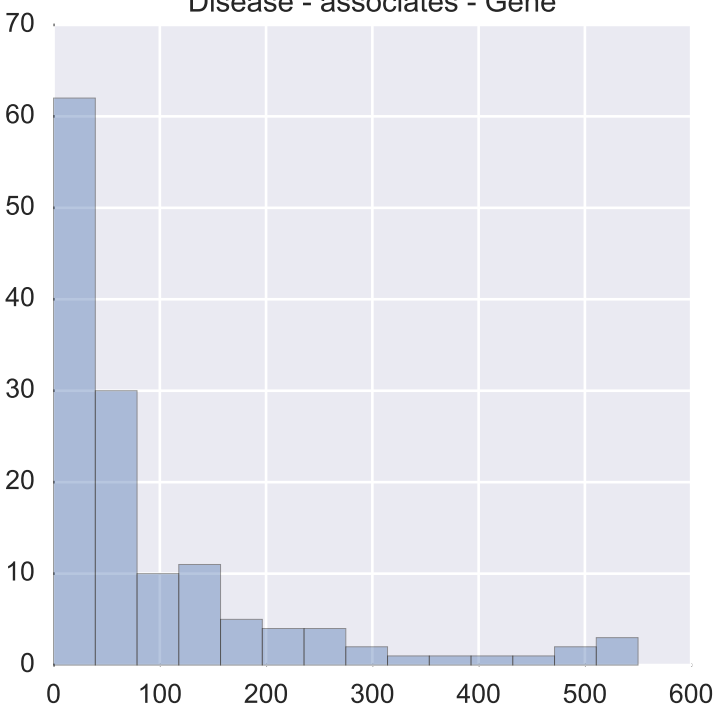

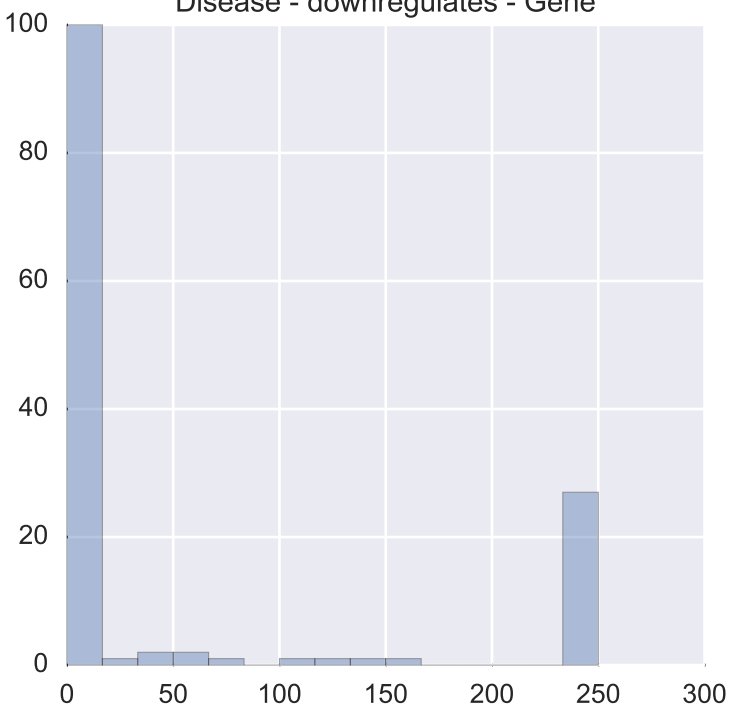

Cellular Component - participates - Gene

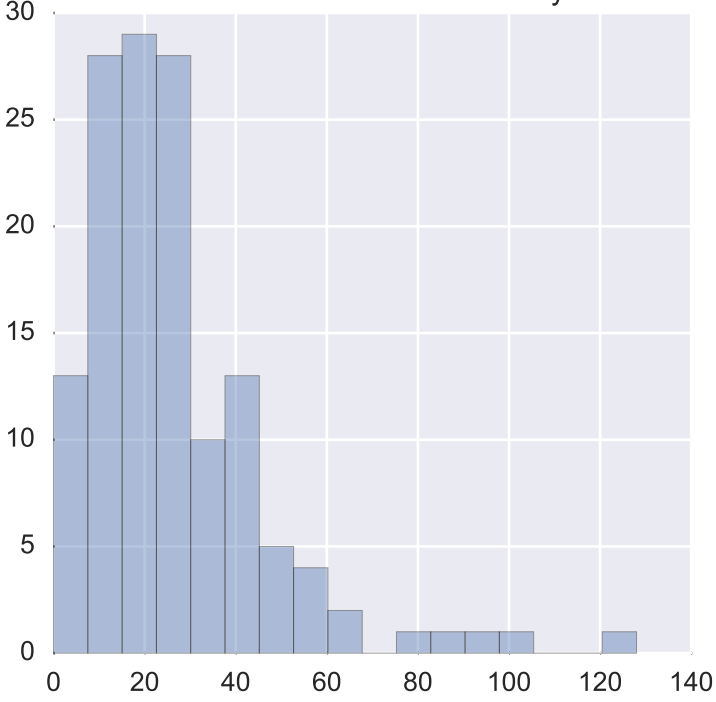

Disease - associates - Gene

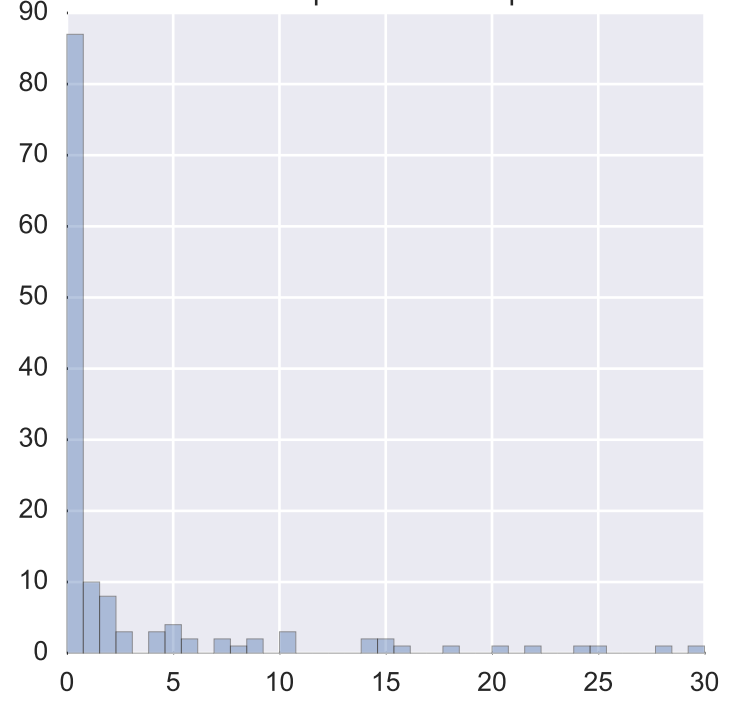

Disease - downregulates - Gene

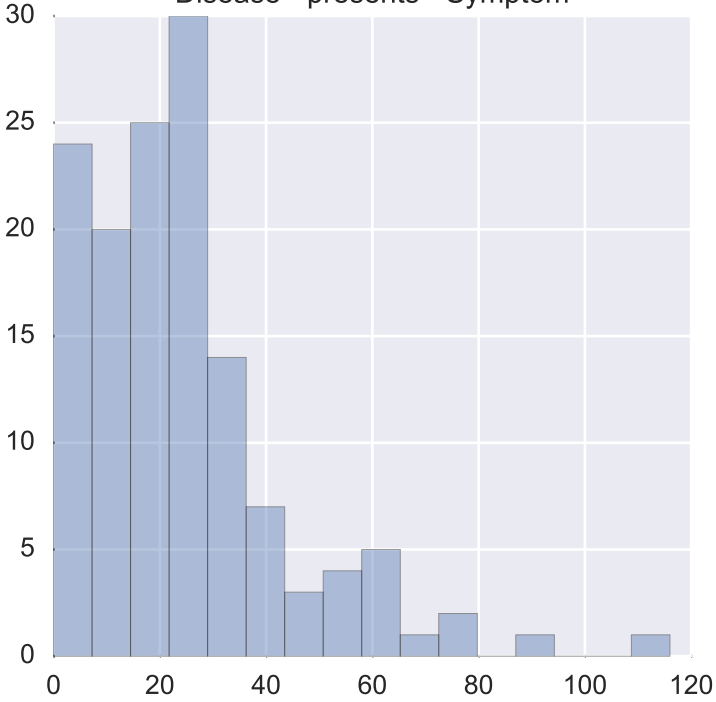

Disease - localizes - Anatomy

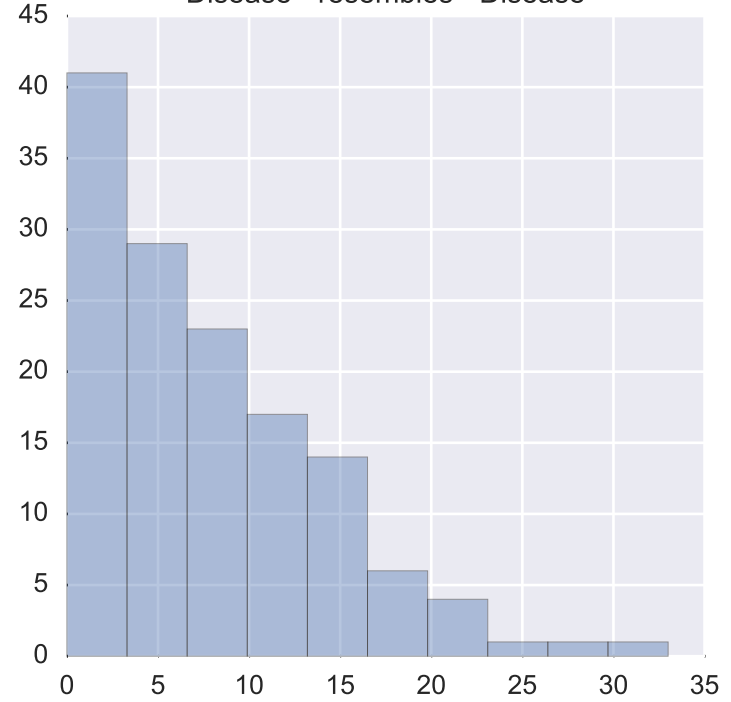

Disease - palliates - Compound

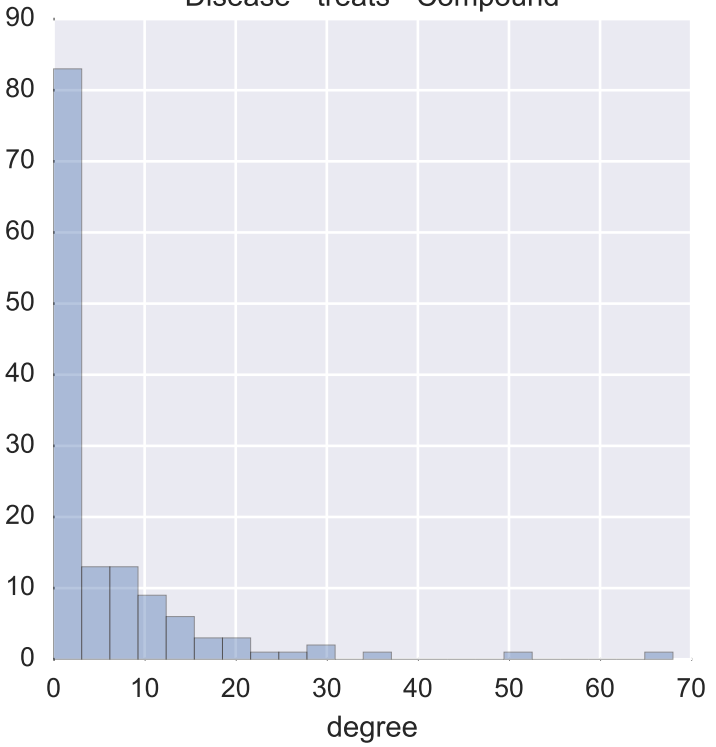

Disease - presents - Symptom

Disease - resembles - Disease

Disease - treats - Compound

Disease - upregulates - Gene
